REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach: a method of positing a seal in a groove in an axial bore of a housing comprising the steps of: applying a radial force to said cylindrical seal to deform the cylindrical seal with respect to the projection and the end of first pin into an approximate C-shape, the C-shape cylindrical seal having an overall dimension that is smaller than a diameter of the cylindrical body; inserting a second pin in the second axial bore such that an end thereon extends past the first end of the cylindrical body to retain the cylindrical seal in the C-shape, inserting the seal with the cylindrical body with the cylindrical C-shape into the axial bore of the housing until the cylindrical seal is in radial alignment with the groove, removing the first and second pins from the cylindrical body such that the cylindrical seal resiliently expands from the C-shape to a circular shape to fill the groove, and retracting the cylindrical body from the axial bore to complete the installation of the seal in the housing in combination with the other elements of the claimed invention. .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
